13 June 1962

MEMORANDUM FOR: Executive Director
Central Intelligence Agency

SUBJECT: Fiscal Year 1964 Foreign Intelligence Plans and
Programs

1. On 14 May you sent me the submissions of the various CIA elements on Plans and Programs for Fiscal Year 1964 with the following comment. "I have glanced at them but see no necessity for a detailed review until your staff has had a chance to analyze them in conjunction with the submissions by other agencies. After that is completed I would like to meet with your staff and discuss the CIA submissions."

2. The Coordination Staff now has a reasonably complete picture of the nature of the FY-1964 program presentations which will be made by the departments and agencies of USIB, based on receipt of the actual program submissions in some cases, and in other cases on inspection of drafts of program submissions which will be received in final form in the near future. It appears that all submissions have been prepared in accordance with the USIB instructions except the program submission received from the DD/P, which is much more limited in the information presented and is not in accordance with the format specified by USIB. These deficiencies will hinder the Coordination Staff in making an effective and complete review and analysis in conjunction with the submissions from other agencies. It is particularly desirable that this review be as effective as possible in view of Mr. McCone's emphasis, at the USIB meeting of 28 February 1962, on the increasing importance to his over-all coordination responsibilities of a review of future plans and programs in the community such as could be derived through the approved instructions for reporting FY-1964 programs.

3. I would appreciate it, therefore, if you would request the DD/P to submit a revised version of its FY-1964 plans and programs, following the instructions and format specified in USIB-D-1.5/21 dated 16 February 1962. The Coordination Staff is available to assist DD/P in any way regarding questions or interpretation of the USIB instructions.

4. It is also noted that no program information has been received for the DD/R element of CIA, or for any research and development activities within CIA other than from DD/I components. Again, in order to perform a complete and effective review in conjunction with other Agency submissions, this category of information is needed from CIA.
